

/home/afontraille/QT
CREATOR/backOfficeNW
/connexion.h

```
graph TD; A["/home/afontraille/QT  
CREATOR/backOfficeNW  
/connexion.h"] --> B["QDialog"]; A --> C["QSqlDatabase"]; A --> D["QSqlTableModel"];
```

The diagram illustrates a header file's dependencies. A central box at the top contains the file path `/home/afontraille/QT CREATOR/backOfficeNW /connexion.h`. Three blue arrows originate from the bottom of this box and point to three separate boxes below it. The left box contains `QDialog`, the middle box contains `QSqlDatabase`, and the right box contains `QSqlTableModel`. This indicates that the header file `connexion.h` includes or uses these three Qt classes.

QDialog

QSqlDatabase

QSqlTableModel
